

COMPUTERS DICTIONARY

Adding		Multiplication	
Address		Optical disk drive	
Alter		Output device	
Analogue computer		Palmtop	
Basic operations		Paste	
Binary code		Portable	
Bundles of wires		Power supply	
Bus		Powerful computer	
Cart		Preceding generation	
Clock		Primary storage	
Company payroll		Printer	
Control circuitry		Processing machine	
Converge		Requirement	
Copy		Roll-away	
Counter		Scientific computation	
Counting		Sequence of operations	
CPU		Set of operations	
Data path		Software	
Display		Store	
Distinct		Stylus	
Division		Subnotebook	
Embedded computer		Subtracting	
Execute		Supercomputer	
Expansion card		Tablet	
Facility		terminal	
Fully programmable		Thin client	
Handheld		Threshold	
Hybrid computer		Timer	
Indicate		Track	
Indicator		Unmanned spaceflight	
Input device		Versatile	
Instruction		Workstation	
Instruction set			
Keyboard			
Laptop			
List of cells			
List of instructions			
Logic unit			
Machine language			
Mainframe			
Manipulate data			
Memory capacity			
Monitor			

PROGRAMMING LANGUAGES DICTIONARY

Artificial intelligence		Shell scripting	
Assembler		Prototyping	
Assembly language		Builtin	
Binary code		Web design	
Coding		Syntax	
Compilation			
Compile			
Compiler			
Complicated program			
Computer programming			
Data storage media			
Executable			
Execution			
General purpose language			
High-level language			
Imperative			
Interface			
Interpret			
Interpretation			
Interpreter			
Low-level language			
Machine code			
Mnemonic			
Object-oriented programming			
Overhead			
Pasteboard card			
Platform			
Procedural			
Programmer			
Programming language			
Programming paradigm			
Punched cards			
Run			
Scripted			
Set of commands			
Software applications			
Soldering iron			
Target computer			
Translate
